Graduate Programme

PROFESSIONAL SUMMARY

Graduate ICT Honours candidate with strong coding and analytical skills, experienced in building end-to-end data pipelines using Python, SQL, and Databricks. Proven ability to design scalable solutions, automate workflows, and transform raw data into reliable, business-ready insights. Ready to contribute to data driven teams by solving real problems and delivering high-impact technology solutions.

EDUCATION

Bachelor's degree in information and communication technology honours (NQF 8) *Expected: 2026*

- Durban University of Technology

Bachelor's degree in information and communication technology (NQF 7) *Completed: 2025*

- Durban University of Technology
- Overall Average: 72% | 15 Distinctions

PROJECTS

InsightOps E-commerce BI System (GitHub link)

- Raw transactional data lacked structure for meaningful analysis, so I designed a Star Schema warehouse and ETL pipeline that produces analytics-ready KPIs and reduced reporting effort by 90 percent.

South African Job Market Pipeline and Tracker (GitHub link.)

- Fragmented and outdated job data made it hard to find real entry-level roles, so I built an automated ETL pipeline that aggregates, cleans, deduplicates, and stores 900+ active listings in PostgreSQL.

Databricks Medallion Sales Pipeline (GitHub link.)

- Unstructured sales data lacked quality, scalability, and auditability, so I engineered a Medallion Architecture pipeline using PySpark and Delta Lake with validation, versioning, and performance optimization.

TECHNICAL & SOFT SKILLS

Data Engineering:

- ETL/ELT Pipeline Development
- Data Modelling & Warehousing
- Star Schema Design
- Business Intelligence & Analytics
- Data Quality & Validation

Cloud & Big Data Platforms:

- Microsoft Azure (Data Factory, Data Lake, Synapse fundamentals)
- Databricks (PySpark, Delta Lake basics)
- dbt (Data Build Tool)

Machine Learning:

- ML Fundamentals & Pipeline Integration
- Predictive Modelling

Programming Languages:

- Python
- SQL
- Java
- C#

Tools & Technologies:

- Git (version control)
- Docker (containerization)
- Power BI (dashboards & reporting)
- CI/CD Fundamentals

SOFT SKILLS:

- Agile Delivery & SDLC
- Stakeholder Communication
- Documentation & Technical Writing
- Problem-Solving & Analytical Thinking
- Teamwork & Collaboration

CERTIFICATIONS

- Microsoft Azure data fundamentals (DP900) (Show Credentials) *2025*
- Databricks fundamentals (Show Credentials) *2025*
- Data Engineer Associate certificate (Show Credentials) *2026*
- SQL Intermediate *2026*
- Introduction to Cybersecurity *2024*
- IBM Spark Fundamentals I *2025*
- Dbt Fundamentals *2026*
